

The Liturgical time is pedagogical and as such invites us these days to simply accompany Jesus with love and depth; and celebrate with Him, his disciples and with Mary the Paschal mystery ; these meditations from the beginning of the Christian community have been central in the deepening of the faith in its transmission and of the discipleship.
Contemplate, worship Jesus in his self-giving, abandonment and feel His confidence; let us accept his salvation; live out that forgiveness which He gives - from the Cross and in the Cenacle after the resurrection – to overcome all discrepancies, divisions; to heal our wounds and make us able to forgive. Let's open our hearts so that His feelings and attitudes be print more and more in our lives. Then we can go to meet others, relieve their pain and bring hope.

"***May our Lord grant you a happy Easter of Resurrection, and everyone may rise to new life of grace together with his Divine Majesty imitating the virtues of Him that we have meditated at the foot of the Cross.*** "(Ma Antonia Paris, Letter 269)
